- Study resources about the lab

Lab Content:

The experiments in this course generally build upon material covered in lecture. Each experiment describes one or more theoretical concepts, and then presents exercises to implement the concepts within the Matlab environment. All of the lab content is directly relevant to the exercises, so it's important that each section be read and understood before performing the corresponding exercises. As a rule, the entire lab should be read before your section meeting. You'll spend less time in lab that way. If the lab work is not completed during the lab period, the remaining work should be done during open lab time or at home.

Lab Order:

Week1: Lab 1 (Introduction to Matlab),

Week2: Lab 1 (Other content)

Week3: Lab 2

Week4: Lab 3

Week5: Lab 4

Week6: Lab 6.1

Week7: Lab 6.2

Week8: Lab 5.1

Week9: Lab 5.2

Week10: Lab 8

Week11: Lab 9.1

Week12: Lab 9.2

Week13: Lab 10.1

Week14: Lab 10.2

Week15: TBD

Attendance:

- Students must attend laboratory whenever they are healthy. Students are not allowed to leave before the end of their lab section unless they hand completed lab report to the TA. If you need to miss a lab due to a health problem, job interview or some other reasons, tell the TA as soon as possible. At the end of the

section, students should sign out. If the signature is missing, your quiz score will be reduced by 2 points. No cheating is allowed and punishment will be decided by instructors accordingly.

- No drinking, eating or smoking in the lab.

Laboratory Components:

- **Quiz:**

- 30% of total lab grade
- Given weekly at **beginning** of session, except for first week
- 15 minutes to complete and 10 points per quiz
 - ◇ Based on homework assignment and lab content of the previous week
- If student is late more than 10 minutes for quiz, will NOT be allowed to take makeup without valid excuse. The makeup quiz may be held during open office hours.

- **Laboratory exercises:**

- 70% of total lab grade
- Work done in groups of two. Each lab partner needs to perform all of the exercises. **Do not** divide the exercises between you and your partner.
- Coding exercises are to be conducted during session
- Lab reports are to be completed at home

- **Lab Report:**

- Only one lab report per group. You should each do your fair share of the work in preparing the reports. You only need to turn in what is specifically requested in the “**INLAB REPORT**” boxes in the lab documents. No formal reports are required. Please use the **cover sheet (sample is provided in “[EE438L Introduction and Guidelines](#)”)** provided on the lab website. Please contain the **last names of all members** in your group for each plots and code listings.
- Report due **beginning** of the next lab session **before** quiz.
- Electronic copy of code must be handed in before the due time of lab report
Email them to: 438lab@gmail.com weekend of when the lab is due.
- Compress all your documents into one zip/rar/tar file. Name your file with
LASTNAME_SECTION_LAB#
LASTNAME: include all students in a group
SECTION: T for Tuesday, R for Thursday
LAB#: number of the lab
- Late reports will be penalized at 10 points per day
- Discussion between groups is encouraged, but sharing code is prohibited

- **Lab Report Grading:**

- Lab report is graded out of 100 points
- Grading rubrics established in previous semesters (contain list of points for each exercise and question) will be used to grade lab reports. Rubrics will not be distributed to the students.

Cheating:

Don't do it. Specifically, if you have access to a previously graded lab report, do not even look at it. Certainly do not use someone else's code to perform the exercises. The course has a formal policy for the action taken for these offenses, which includes a reduction in grade and referral to the Assistant Dean of Students.
