

ECE 438 Digital Signal Processing

Week 5: Interpolation and Decimation

Date _____

Section ____

Name	Sign	Time spent outside lab
[%]		
[%]		

Grading Rubric (Fall 2019)

	below expectations	lacks in some respect	meets all expectations
Completeness of the report			
Organization of the report <i>One-sided, with cover sheet, answers are in the same order as questions in the lab, copies of the questions</i>			
Quality of figures <i>Correctly labeled with title, x-axis, y-axis, and name(s)</i>			
Understanding of discrete-time interpolation (50 pts) <i>Plots of signals and their frequency spectrum, questions</i>			
Understanding of discrete-time decimation (50 pts) <i>Matlab code, questions</i>
